MACHADO MEYER WINS BRONZE MEDAL IN THE ECOVADIS SUSTAINABILITY RATING 2026

24 SEPTEMBER 2026

Machado Meyer has been awarded the Bronze Medal in the EcoVadis Sustainability Rating 2026, one of the world's leading corporate sustainability assessment platforms. With this result, the firm now ranks among the top 35% of organizations rated by EcoVadis over the past 12 months.

The assessment evaluates criteria related to Ethics, Labor Practices and Human Rights, Sustainable Procurement, and Environment, analyzing the policies, processes, and initiatives adopted by organizations to promote responsible and sustainable practices.

"We are very pleased to receive this recognition, as it reflects the cross-functional work carried out by different areas of the firm and our ongoing commitment to advancing our ESG agenda, embedding these principles into Machado Meyer's management and institutional operations," says Karime Damasceno, Internal Compliance Manager at Machado Meyer.

In previous cycles, Machado Meyer received the ESG (Environmental, Social and Governance) Sustainability Commitment Seal and, in 2026, moved up to a new recognition category, earning the Bronze Medal. This achievement marks a new milestone in the firm's journey with EcoVadis.
