

TECHNOLOGY

TRANSFORMATION IS POSSIBLE

Technology is one of the most dynamic sectors of the economy. Constant innovations promoted by entrepreneurs and new consumer demands transform business models, markets and society as a whole. Regulations evolve as a result of these new needs, but often at a slower pace. And this is one of the main challenges for technology companies in Brazil today. Relying on efficient and proactive legal advice is an important advantage for a successful venture.

With the experience and knowledge of our teams, we help companies around the world understand the Brazilian legal framework, assess and mitigate risks, and enable business. We assist organizations in different sectors in areas as current as sharing economy, video on demand, Internet of Things (IoT), personal data protection, and aspects relating to the Brazilian Civil Rights Framework for the Internet.

We have a very entrepreneurial vision and concern to analyze the proposed business models and find a legal framework that is safe and efficient from a contractual, tax, and regulatory perspective.

In cases where the Brazilian regulation still does not follow market developments, we study the interpretation of our courts on related issues and seek the safest way for our clients to make their business vision a reality.

OUR EXPERIENCE IN THIS SECTOR INCLUDES SERVICES IN THE FOLLOWING AREAS:

- Regulatory consulting
- Structuring contracts to implement business models, R&D, and licensing rights
- Advice on intellectual property
- Tax consulting and litigation
- Mergers and acquisitions involving technology companies
- Corporate law applied to technology business
